What is Slidev?

Slidev is a slides maker and presenter designed for developers, consist of the following features

-  **Text-based** - focus on the content with Markdown, and then style them later
-  **Themable** - theme can be shared and used with npm packages
-  **Developer Friendly** - code highlighting, live coding with autocompletion
-  **Interactive** - embedding Vue components to enhance your expressions
-  **Recording** - built-in recording and camera view
-  **Portable** - export into PDF, PNGs, or even a hostable SPA
-  **Hackable** - anything possible on a webpage

Code

Use code snippets and get the highlighting directly!^[1]

```
interface User {  
    id: number  
    firstName: string  
    lastName: string  
    role: string  
}  
  
function updateUser(id: number, update: User) {  
    const user = getUser(id)  
    const newUser = { ...user, ...update }  
    saveUser(id, newUser)  
}
```

Components

You can use Vue components directly inside your slides.

We have provided a few built-in components like `<Tweet/>` and `<Youtube/>` that you can use directly. And adding your custom components is also super easy.

```
<Counter :count="10" />
```

Check out the guides for more.

```
<Tweet id="1390115482657726468" />
```

The image shows a screenshot of a Twitter feed. The first tweet is from the account @Slidevjs, which has a profile picture of a blue play button icon. The tweet text is: "1K Stars on the Launch Day?! That's awesome! Thank you :)" with a heart emoji. The second tweet is also from @Slidevjs, with the text: "BTW, v0.3.0 just released with LaTeX math support!" It includes a screenshot of the Sliderv.js logo, which features a blue play button icon inside a green circle, with the word "Sliderv" below it. The logo is set against a light gray background with some faint text at the bottom.

1K Stars on the Launch Day?!

That's awesome! Thank you :)

BTW, v0.3.0 just released with LaTeX math support!

Themes

Slidev comes with powerful theming support. Themes can provide styles, layouts, components, or even configurations for tools. Switching between themes by just **one edit** in your frontmatter:

```
---  
theme: default  
---
```

```
---  
theme: serifh  
---
```

Read more about [How to use a theme](#) and check out the [Awesome Themes Gallery](#).

Animations

Animations are powered by [@vueuse/motion](#).

```
<div  
  v-motion  
  :initial="{ x: -80 }"  
  :enter="{ x: 0 }">  
  Slidev  
</div>
```

LaTeX

LaTeX is supported out-of-box powered by [KaTeX](#).

Inline $\sqrt{3x - 1} + (1 + x)^2$

Block

$$\begin{aligned}\nabla \times \vec{\mathbf{B}} - \frac{1}{c} \frac{\partial \vec{\mathbf{E}}}{\partial t} &= \frac{4\pi}{c} \vec{\mathbf{j}} \nabla \cdot \vec{\mathbf{E}} = 4\pi\rho \\ \nabla \times \vec{\mathbf{E}} + \frac{1}{c} \frac{\partial \vec{\mathbf{B}}}{\partial t} &= \vec{\mathbf{0}} \\ \nabla \cdot \vec{\mathbf{B}} &= 0\end{aligned}$$
